

## LEARNING FROM HOME CHALLENGE

May 11 - May 15 2020

Week 5 of Term 2

- Use this task to supplement learning routines while we are learning from home.
- Teachers will be sending home reading, writing and maths tasks specific to your child's ability.
- Remember to also read every day, and complete some simple basic facts practice.
- It is quality not quantity that counts, so take your time to do this challenge with excellence. There are lots of ideas included here so that you have variety and choice.
- You should be able to talk about what you learnt by completing this task and sharing it with your class during the first week back at school.

## Creativity

All of us have creative ways of doing things.

### The task:

For this week's whole schoolwide task you have to create a way of showing your classmates what you are thankful for, and a positive lesson you have learnt during the Covid 19 Lockdown period.

**Some ways you can display this creative item could include using:**

- A dance or play
- A picture, painting or other form of visual art
- A piece of music
- A movie you have created
- Something you have built
- Something you have baked!(1 item to show-not share)
- A story, poem or something else written.

The choice is yours! Remember to get a parent to assist you if needed.
